Internship Offer Letter

Student Name : DONGA MEENAKSHI
Stream : B.Tech
Branch : B.Tech(Artificial Intelligence and Machine Learning)
Institute Name : Swarnandhra College of Engineering & Technology
Internship Domain : Google Android Developer
Internship Duration : January 2026 - March 2026
AICTE Student ID : STU67eb8386cab6d1743487878

We are pleased to inform you that you have been selected for the 10-Week **AICTE – EduSkills Virtual Internship Program**.

During this internship, you will learn and demonstrate industry-relevant skills that will enhance your employability and strengthen your confidence in the subject area.

The program is designed to provide structured learning combined with practical exposure.

Internship Structure & Evaluation:

- The internship will follow a **week-wise structured learning plan**.
- You will be required to complete **weekly assessments** to track your progress and understanding.
- Certain modules will require submission of **project documentation and assignments**.
- In the final week, you must appear for a **Final Assessment Test**.
- The final grade will be based on your overall performance, including weekly assessments, project submissions, and the final test.

Upon successful completion of all required steps and assessments, you will be awarded a **Virtual Internship Certificate**.

Please note that this offer letter will be considered valid only after the successful completion of the internship program and fulfillment of all assessment requirements, including obtaining the final completion certificate. Without the final completion certificate, this offer letter shall not be treated as a valid document for any official purpose.

The week wise Structure of the Internship is as Follows:

Week	Module	Description
Week 1	Your first Android app	Learn Kotlin basics, set up Android Studio, create your first project, and build a simple Android app displaying text and images.
Week 2	Building app UI	Learn Kotlin fundamentals, including object-oriented programming and lambdas. Handle button clicks in Android apps and build a tip calculator app to manage user input and UI state.
Week 3	Display lists and use Material Design	Learn advanced Kotlin concepts, build scrollable lists with Compose, and create visually appealing Android apps using Material Design, animations, and accessibility best practices.
Week 4	Navigation and app architecture	Learn to add navigation drawers, use Architecture Components like ViewModels and StateFlow, implement navigation in Jetpack Compose, and adapt apps for different screen sizes.
Week 5	Connect to the internet	Learn to fetch data from the internet using coroutines, HTTP, and REST, and display images in your app using Coil with best architecture practices.
Week 6	Data persistence	Learn SQL basics, use Room for database management, and store simple key-value data in Android apps using Preferences DataStore.
Week 7	Work Manager	Learn to schedule and manage background tasks in Android apps using WorkManager, ensuring work runs reliably even when the app is not active.
Week 8	Views and Compose	Learn Android Views basics, integrate composables into View-based apps, and use existing Views within Jetpack Compose for hybrid UI development.
Week 9	Assessment	Assessment
Week 10	Final Credential Validation	Final Credential Validation

Note: There is no stipend associated with this internship.

We congratulate you on your selection and wish you a successful learning journey.
